Themer

HTML + CSS + JS

+ themes + base themes + starter themes + theme functions + template files + render arrays + preprocess functions + process functions + alter functions + theme hook suggestions + views + display suite +panels + cray cray

What base theme do *you* use?

It depends.

Measuring Up

What type of projects are you building?

Who maintains the site after launch?

What can be reused?

Where do you need to build in flexibility?

Stanford | Stanford Framework

ABOUT STANFORD FRAMEWORK

Stanford Framework is a base theme specifically designed for Stanford. This theme includes approved Stanford branding and styles, as well as useful theme options for creating site title treatments that align with Stanford's identity guidelines.

Stanford Framework is ideal as a base theme on which to build Stanford-branded sub themes.

Stanford Framework is available for official group and department websites. It can be enabled by request on your Stanford Sites website, or provided as a download for use on other hosting services.

The American Prospect

When the *Prospect's* needs for publishing had outgrown a rigid proprietary platform and constraining design, they chose Aten to help completely recreate their website – from publishing backend to user experience.
