
Sass, Compass, Aurora, Corona w/ Susy

An experiment with a
responsive Admin theme

Sass (or Scss)

- Shorthand CSS
- Uses Nesting, Variables, Mixins and more
- Easier and shorter than regular CSS

```
$blue: #3bbfce;  
.content-navigation {  
  border-color: $blue;  
  color:  
    darken($blue, 9%);  
    a{  
      text-decoration: none;  
    }  
}
```

Compass: Sass compiler with modules

- Dynamic file includes (partials)
 - `_` or not
 - Breakpoint & Respond-to
 - <https://github.com/snugug/respond-to#usage-example>
 - Susy: Responsive framework for Compass
 - Corona is built with Susy
 - <http://susy.oddbird.net/>
-

Aurora, Corona

- Aurora is a well maintained Drupal theme
 - Sass powered
 - Corona: Aurora distro
 - Comes with Sass, defaults and great structur
 - Super easy to deploy
 - *compass create [theme-name] -r aurora --using aurora/corona*
-

Astonishing Admin (Prototype-Dev-Pre-Alpha-Test-Nightly)

- Full admin desktop
 - Mobile device fit
 - Hidden menu
 - Overflow-x
 - NO OVERLAY!!1!

 - To Do:
 - Better design
 - Work with Admin Menu
 - Mobile: touch events, forms, interactions, collapsable menu
-

Marketability

- Community Contrib...
 - Easier Drupal admin on the go...
 - Astonish branding on each site...
-

Cost

- So far: 6 hours @ \$145/hr - \$870
 - Dev on theme, not including the stone age stuff I was doing pre-Wed
-
