

Easy map starter kit

Geofield

Views

IP Geolocation Views & Maps

Leaflet

and:

Leaflet More Maps

Leaflet MarkerCluster

What's not to like?

easy to put together, great feature set, optimised for mobile,
supports annotated markers, line-strings & polygons,
swap modules in/out without reworking the rest of your solution,
animated clustering of up to 5000 markers

For postal addresses instead of lat/long add: **AddressField + Geocoder**

For bulk import of locations (e.g. spreadsheet) add: **Feeds**
