Behaviors

Displays

Configure interactive map behaviors. Behaviors are general interactions for the map, they can be anything from popups or keyboard handling. Enable the ones you want and their respective options. Note that some behaviors do not work with each other or one may encompass another.

▼ **KEYBOARD CONTROLS**

☒ Keyboard Controls

Provides keyboard shortcuts to pan and zoom the map, such as the up, down, left, and right arrows. This is included with the Navigation control. This should not be enabled unless you want to have finer control on how the user interacts with the map.

► **LAYER SWITCHER**

▼ **NAVIGATION**

☒ Navigation

Provides the ability to navigate the map interface. This is just for user interactions and does not show any visual controls. This behavior automatically includes the Pan Zoom, Zoom Box, and Pinch Zoom controls.

▼ **OPTIONS**

☒ Enable Zoom Wheel

Enable zooming via the mouse scroll wheel. This can interfere with page scrolling.

☒ Enable Zoom Box

Enable zooming with selecting a box by *SHIFT + clicking*.

☐ Document Drag

Allow panning of the map by dragging outside map viewport.

▼ **PAN AND ZOOM BAR CONTROLS**
