

So many modules !@#%!

Start here:

“Comparison of mapping modules”

<http://drupal.org/node/1704948>

Each module forms one moving part of your mapping solution.
Count on having to employ 4 to 6 modules.

You can't combine any *this* with any *that*.

Modules are at various levels of compatibility, maturity,
feature sets and lengths of issue queues.

D8 ?
